

SmoothDome[®] Slotted Cap

SmoothDome[®] Slotted Caps are welcomed by welders for their smooth crown and light weight. These caps meet all applicable requirements for a Type I (top impact) helmet as outlined in ANSI/ISEA Z89.1-2009 (Class E) and CSA Z94.1-2005 (Class E).

SmoothDome Caps also meet the ANSI/ISEA Z89.1-2009 voluntary standard for reverse donning and low temperature [LT]. Look for the official reverse donning logo  to determine if your hard hat may be worn backwards without voiding approvals.

MSA can customize your helmets with your company logo and choice of reflective striping. For more information regarding logos and stripes, contact **MSA Logo Express at 1.800.MSA.LOGO.**

▲ WARNING

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard size suspension with standard size helmet). Use only MSA suspensions on an MSA helmet. **Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.**

*SmoothDome Cap meets the voluntary standard for hi-visibility as prescribed by ANSI/ISEA Z89.1-2009. Look for the official hi-visibility marking [HV] on the helmet's ANSI label.

Note: this bulletin contains only a general description of the products shown. While uses and performance capabilities are described, under no circumstances shall the products be used by untrained or unqualified individuals and not until the product instructions including any warnings or cautions provided have been thoroughly read and understood. Only they contain the complete and detailed information concerning proper use and care of these products.
